SUMMARY

I am a graduate of Istanbul Aydın University Computer Programming Department and I have been working on my department since 2015.

Since 2015, I have been involved in software work, covering a variety of fields of study.
Among my works are HTML, CSS, JavaScript, PHP, MySQL etc. code languages available.

Other competencies;
. Adapt at problem-solving,good organizational skills and handle multiple projects.
. Highly organized,with a disciplined approach to prioritizing workloads and schedules for working in a fast paced environment with challenging internal and external projects.
. Keen to train and continuously upgrade skills in order to progress professionally.
. Interest in new techonologies and willingness to share ideas with others.
. Comfortable working in a highly collaborative team environment
. Ability to communicate clearly & effectively – both in written and verbal forms,in a multifunctional team environment.

EDUCATION

University   İstanbul Aydın University – İstanbul
                                        Computer Programming(ing) – 09/2015 – 06/2018

Language School   St Giles International – Brighton - England
                                        English lessons – 07/2017 – 11/2017

WORK EXPERIENCE

Future IT Yazılım Arge A.Ş - Software Developer Specialist (2021-2022)
VARTUR - Software Developer Specialist (2020-2021)
KCE Finansal Yazılım – Software Developer Specialist (2019/2020)
EURABAU Group - Software Department (20/02/2019)
İtameks A.Ş – Data Processing (07/2014 - 02/2015)
Sarıyer Belediyesi – Data Processing(06/2012 - 06/2014)

PROJECTS

1-) Using React.JS - TypeScript - Node.JS - Javascript - HTML - CSS , enterprise crypto
website project

Enterprise crypto website project designed using various libraries written in React.JS -
TypeScript - Node.JS - Javascript - HTML - CSS
https://metavault.trade/

2-) Dashboard Project

Crypto Dashboard project using various libraries written with React infrastructure.
https://app.metavault.org/#/dashboard

3-) React - Website design using Style Components and responsive to all screens

It is a React website project that uses styled components and React smooth scrolling. The
website is fully responsive and React Hooks and React Router were used for this project. Master
sections are reusable components that you can customize and reuse anywhere on your site.

-Creating Navbar
-Styling Navbar
-Creating Sidebar/Dropdown Menu
-Styling Sidebar
-Creating Home Page
-Creating Hero Section
-Styling Hero Section
-Creating Button Element
-Creating Reusable Info Section
-Styling Info Section
-Adding Data to Info Section
-Adding Smooth Scroll to Info Section Buttons
-Creating Services Section

-Styling Services Section
-Creating Sign In Page
-Adding React Routes to Website
-Creating Footer
-Styling Footer
-Changing Navbar background on scroll
-Adding React Scroll to our site
-Creating Sign In Component
-Scroll to Top on Page/Route Change

You'll find answers to all the basic questions like I'm building this object-oriented project from scratch by combining the powers of Javascript and HTML.

4-) Using Laravel - PHP - Javascript - Ajax, enterprise crypto website project

Corporate crypto website project designed using various libraries written with PHP, Javascript, jQuery and Laravel infrastructure
https://www.bitexen.com/

5-) Using Laravel - PHP - Bootstrap - Javascript - jQuery - Ajax, corporate website project

Corporate web project using various libraries written with Bootstrap, Javascript and Laravel infrastructure.
https://kceyazilim.com/

6-) Using PHP - Bootstrap - HMTL - jQuery , OOP manageable real estate project and administration panel

I made a manageable corporate web project using Bootstrap and various libraries. It meets all the functions required on the corporate website. Every point of our website can be controlled with the administration panel. Major issues are as follows;

-Creating a design
-How the page is divided into sections
-Php writing all codes (oop oriented)
-PDO queries
-Fully managed panel
-Connecting a web site with the management panel

You can find answers to all basic questions such as I am building this object oriented project from scratch by combining the forces of PHP and PDO.
https://vartur.com/

7-) Using PHP - Bootstrap - PDO - Jquery - Ajax, manageable website and administration panel with OOP

I made a manageable corporate web project using Bootstrap and various libraries. It meets all the functions required on the corporate website. Every point of our website can be controlled with the administration panel. Major issues are as follows;

-Project creation
-Creating a design
-How the page is divided into sections
-How to blend with Php
-Php writing all codes (oop oriented)
-PDO queries
-Fully managed panel
-Management panel planning
-How should the management panel be?
-Connecting a web site with the management panel

You can find answers to all essential questions like. I'm creating this object oriented project from scratch by combining the powers of PHP and PDO.

8-) Online Chat

I developed the chat application (instant chat) used in corporate sites and various areas with AJAX and jQuery programming languages. I used HTML, CSS, JavaScript libraries in the project. The project consists of 6 main parts. The sections are as follows: user login and logout, view who typed in instant chat, view active users, change chat text color and background color, clear chat, save chat.
